

FourQuest Energy places 5th on *Alberta's Fast Growth 50* for 2013 list.

EDMONTON, AB (January 15, 2013) - FourQuest Energy is pleased to announce that we have placed 5th on Alberta's Fast Growth 50 list. The Fast Growth 50 list is determined by a number of factors, including revenue growth, capital expenditures, marketing, and R&D budgets. The decision of the panel is based on a holistic picture of company growth.

"We are pleased to be included for the second year in a row, moving up to fifth on this year's list," said Nik Grigic, FourQuest Energy President. "Our continued growth once again highlights our employees' hard work and dedication to exceeding our customers' expectations."

"An aggressive global growth was our strategy right from the start. Although there are inherent risks, especially with localization in foreign countries, it's a strategy that has provided an excellent environment for our employees, both from a personal advancement perspective and geographically, with many opportunities to work abroad," said Karl Gannon, Executive Vice-President. "In summary, FourQuest Energy is an exciting place to work and we hope to continue this growth plan for a long time to come. We are very happy to receive acknowledgement of this success."

"FourQuest Energy is once again among the leaders on the Fast Growth 50 list, having risen from tenth place in 2012 to fifth this year," says Michael Ganley, editor of Alberta Venture. "It's a testament to sound management and well-executed planning."
